Upon receipt of the firearm/parts, the Cerakote applicator will inspect all items and may notify the customer of any special requirements (or clarify project details), which may incur additional costs prior to application. Firearms must be completely stripped (all pins and parts disassembled) to avoid an additional disassembly/assembly fee. A partial fee can be accommodated if you have difficulty disassembling/reassembling certain parts. An additional fee will be incurred if excessive cleaning is required for disassembly, reassembly, and preparation for Cerakote application.
